

Permit Facilitation

One of our specialties at Gallaway Consulting is providing permit facilitation services to our clients. Maneuvering through the environmental regulation associated with development or improvement projects, large and small, can be costly and time consuming. Our goal at Gallaway Consulting is to facilitate this process in the most time-efficient and cost-effective manner feasible, while protecting the environmental resources these regulations have been established to conserve. The continuance of mutually respectful relationships with the regulatory agencies, other pertinent groups, and individuals, supports our efforts in streamlining these tasks. Further, by offering a full-line of services, the team at Gallaway Consulting is able to process multiple applications at the same time

and respond with innovative solutions to project mitigation and compliance. We coordinate with clients and agencies to solve compliance problems, negotiate revisions, and create alternatives that meet the objectives of project and permitting agencies.

GC has facilitated environmental permitting for a wide range of activities from private developments to road, highway, bridge and infrastructure projects. GC wide range of

permitting experience enables effective maintenance of project timelines, objectives and developing creative solution for even the most complicated permitting situations. GC effectively coordinates with clients and agencies to implement project objectives while protecting natural resources and sensitive species.
