

### Geographic Information Systems

Gallaway Consulting offers in-house Geographic Information System (GIS) and Global Positioning System (GPS) services. The integration of a graphic based medium with spatial data provides our clients with sophisticated informational products from which decisions can be made and ideas presented. Our GIS staff possesses the skills, knowledge and out-of-the-box thinking to handle virtually any mapping request for the wide spectrum of environmental services we provide.

### Spatial Modeling

Gallaway Consulting integrates the use of cutting edge software with scientific knowledge to create predictive models of environmental resources. Spatial modeling projects include assessing the risks to water resources from agricultural pesticide applications to identifying suitable habitat for wildlife on a regional level.

*"GIS allows us to view, understand, question, interpret, and visualize data in many ways that reveal relationships, patterns, and trends in the form of maps, globes, reports, and charts."*

### Data Management

Whether you need data consolidated from several sources, data integrated into a GIS platform, or the management of your company's spatial information, we have the software, skills and understanding to perform the job. Data formats and compatibility vary greatly; we pride ourselves on our ability to integrate the wide variety of data sources available in today's software platforms.

### Services Include:

- Impact Assessments
- Baseline Mapping
- Regional Modeling
- Slope and Viewshed Analysis
- Presentation Graphics
- Data Consolidation and Management
- Remote Sensing
- Aerial Photo Interpretation
