

Job Announcement

Senior Survey Technician

About Us

Established in Chico, California in 1983, NorthStar is a team of professionals providing designs, plans and solutions in the areas of architecture, engineering, environmental, and surveying.

We exist to develop people who enhance our communities. This is our core purpose; NorthStar embraces the idea that we use our professions to make a positive difference for the clients, the community, and the environment...contributing to a better world.

We live our values of Teamcentric, Learning, and Ownership; more than just consultants, we are an integral part of the communities we serve.

Our success comes from building quality relationships with our clients; providing proactive service; and having an enriched team culture of learning, guiding, and mentoring.

NorthStar benefits include a generous salary, extensive health insurance package, 401(k) matching, vacation and sick pay.

Additional company information can be found on our website www.northstareng.com.

Equal Opportunity Employer

NorthStar is looking for a **Senior Survey Technician** to join our team. Come be part of an innovative team with a commitment to quality and client satisfaction. More than just consultants, we are partners with our clients, agencies and the communities we serve - taking ownership in our work, performance, and the success of all our endeavors. We are looking for candidates who value community engagement, superior client service, and a lifetime of learning, with the opportunity for advancement in a challenging and professional work environment.

Overview

The Senior Survey Technician position is a full-time, permanent position here in our Chico, CA office. A Senior Survey Technician at NorthStar has minimum of four years field and office experience in Land Surveying but hasn't obtained the initial certification on the path to licensure. The Senior Survey Technician reports to the Survey Department Manager and is part of a six-person department.

Position Responsibilities

- Provide surveying and mapping support for various engineering and land surveying projects
- Perform routine work as a member or chief of a survey party utilizing state of the art conventional, robotic and GNSS instruments
- Make and interpret routine survey calculations, including construction staking calculations
- Analyze, check, and adjust survey data
- Research survey records
- Prepare maps, plats, exhibits and topographic surveys

Minimum Job Requirements

- 4 years' field and office experience performing land surveying related to residential, commercial, and municipal development
- Ability to prepare maps and perform calculations, including construction staking calculations, utilizing **AutoCAD Civil 3d**
- A basic working knowledge of conventional and GNSS surveying instruments and data collection
- Proficiency in MS Office, including Word, Excel, and Outlook
- Excellent time management, prioritization, and organization skills
- Strong interpersonal skills and the ability to work independently and as part of an effective team
- Strong verbal, written, and graphic communication skills
- A clean driving record and valid driver's license

Additional Desirable Experience

- Working knowledge of Spectra Precision Survey Pro software
- Experience with ESRI ArcGIS
